Precautionary statements

Use personal protective equipment as required to avoid breathing dusts or mists, and to prevent eye contact.

First Aid

Eye Contact:	Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Skin Contact:	Wash with soap and water. If injury occurs, or if discomfort or irritation persists contact a physician.
Inhalation:	If inhaled and discomfort occurs, move to fresh air, and keep person at rest in a position comfortable for breathing. If difficulty in breathing occurs and/or persists, administer oxygen and get medical attention. If medical advice is needed, have product container or label on hand.
Ingestion:	Rinse mouth. Drink Plenty of water. If you feel unwell, call a poison control center seek medical attention. Do not induce vomiting of an unconscious person.

Personal Protective Equipment

Use personal protective equipment as required to avoid breathing dusts or mists, and to prevent eye contact. Wash hands thoroughly after handling.

Individual protection measures: Use personal protective equipment as required to avoid breathing dust/mist, and to prevent eye contact.

Personal Precautions, Protective Equipment, And Emergency Procedures

Personal Precautions

Use dust mask and gloves as needed or other reasonable personal protective equipment as required to prevent contact with eyes or skin. Remove ignition sources prior to clean-up.

Environmental Precautions

Prevent entry into waterways, sewers, basements or confined areas. Do not flush into surface water or sanitary sewer system. See Section 12 for additional ecological information.

Methods for Containment

Prevent further leakage or spillage, if safe to do so.

Methods for clean-up Use dust mask and/or reasonable personal protective equipment as required to avoid breathing dusts. Moisten or cover powder spill with plastic sheet or tarp to minimize spreading. Take up mechanically, placing in appropriate containers for disposal. Avoid creating dust. Soak up excess with inert absorbent material. Clean contaminated surface thoroughly.

Warranty

NOTE: To the extent consistent with applicable law, Buyer assumes all responsibility for safety and performance if this product is not used according to the directions.

What This Preen Product Does

This product prevents crabgrass, dandelions, and other common listed weeds by inhibiting the root development in seedlings. Although this product will not kill existing weeds, it will prevent new weeds from sprouting. This product is natural. Children and pets can play in the area immediately after application.

Please read and follow directions carefully. Use only as directed.

Annual Weeds Controlled

This product inhibits listed weeds from germinating from seed. It will not control plants that are spreading from living plant parts such as runners and rhizomes.

Annual Bluegrass	Clover	Lamb's Quarters	Smooth Crabgrass
Bermudagrass	Creeping Bentgrass	Large Crabgrass	Woolly Cupgrass
Black Medic	Curly Dock	Orchardgrass	Yellow Foxtail
Black Nightshade	Dandelions	Purslane	
Buckhorn Plantain	Giant Foxtail	Redroot Pigweed	
Catchweed Bedstraw	Green Foxtail	Shattercane	

When to Apply

Apply this product during the growing season around established vegetables, herbs, and fruits. Since this product does not kill existing weeds, you must first remove any that have already begun to grow. When your vegetable sprouts have true leaves and are 2 - 3 inches tall, it is safe to apply this product even up to the day of harvest. By applying this product as early as possible, you can eliminate the need for hand weeding. Reapply every 4 - 6 weeks. Since this product only inhibits sprouting seeds, it can be used with confidence around established plants. However, do not apply on newly seeded areas.

How to Apply

Sprinkle this product evenly over the entire soil surface, at the rate of 5 lbs. per 250 sq. ft. If you choose, you can use twice the rate for even better control with no fear of burning your plants. Rake lightly into the soil. Immediately water the top 1 - 2 inches of soil to activate the product. Afterwards, do not water for at least 2 - 3 days. If excessive rain occurs, reapplication may be necessary.

Precautionary statements

Use personal protective equipment as required to avoid breathing dusts or mists, and to prevent eye contact.

First Aid

Eye Contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.

Continue rinsing. If eye irritation persists: Get medical advice/attention.

Skin Contact: Wash with soap and water. If injury occurs, or if discomfort or irritation persists contact a physician.

Inhalation: If inhaled and discomfort occurs, move to fresh air, and keep person at rest in a position comfortable for breathing. If difficulty in breathing occurs and/or persists, administer oxygen and get medical attention.

If medical advice is needed, have product container or label on hand.

Ingestion: Rinse mouth. Drink Plenty of water. If you feel unwell, call a poison control center or seek medical attention. Do not induce vomiting of an unconscious person.

Personal Protective Equipment

Use personal protective equipment as required to avoid breathing dusts or mists, and to prevent eye contact. Wash hands thoroughly after handling.

Individual protection measures: Use personal protective equipment as required to avoid breathing dust/mist, and to prevent eye contact.

Personal Precautions, Protective Equipment, And Emergency Procedures

Personal Precautions

Killing Weeds vs. Weed Prevention

Pulling or spraying only eliminates weeds already above ground.

Preventing creates a weed barrier that stops weeds* from germinating.

Reapply product every 4-6 weeks. It's never too late or too early to apply this product!

*See Use Directions for complete list of treated weeds.
